

DURA[®]
Fitted Garages

If you
enjoy the
thrill **of a**
motorbike

The motorbike workshop you have always dreamed of

There's a true sense of satisfaction in spending an afternoon modifying and enhancing your motorbike. To make this experience even more enjoyable we have designed a workshop that offers everything you need for a luxury motorbike garage.

Our modular tool cabinets and top boxes are available in a variety of drawer combinations; when teamed with a square peg back panel the two work together to ensure each of your tools has a home.

We have integrated tall cabinets with optional shelving to create a space saving storage solution to house bulky leathers and branded apparel. Each cabinet comes with locking mechanisms so you can be assured your expensive equipment is always secure.

To ensure a clean and safe working area we would recommend a sink combined with a glove and towel dispenser to create a convenient wash up space.

We can work with you to colour coordinate your cabinets and flooring or add bespoke decals to back panels to match the brand you admire.

The **Motorcyclist's** Garage

We understand that everybody has different needs, but to show you how versatile our products can be we have created an example layout for the 'perfect' motorcyclist's garage. This garage interior can easily be added to or adapted to suit your exact requirements to create *your dream garage*.

Tall Cabinet

The perfect storage solution for bulky leathers and branded apparel

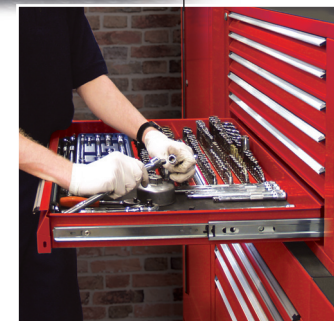

Wash up area

Integrated sink, towel dispenser and waste bin ensure a clean and safe working environment

Square peg panels

Provide extra storage for small hand held tools through the use of a range of hooks and clips

Tool cabinet

Teamed with a colour coordinated top box with foam inlays, the two provide ample storage for a variety of tools
